

## VEHICLE INSPECTION SERVICES 0 KM

As a complement to its capabilities and experience in the field of **quality control and quantity inspections** of goods, **SCI Inspection** offers its customers a thorough **0 Kilometer Vehicle Inspection Service**.

Quality inspection is a process that involves evaluating and verifying products to ensure that they meet the requirements and standards set for their marketing and use. Through this system, it is possible to detect problems in products before they are delivered to customers; as well as identify the root causes of problems and take preventive measures to prevent them from happening again in the future.

Quality inspection is a key tool for continuous improvement, as it contributes to the optimization of production and service delivery processes, which in turn can increase customer satisfaction and the company's competitiveness in the market.

REPORTING

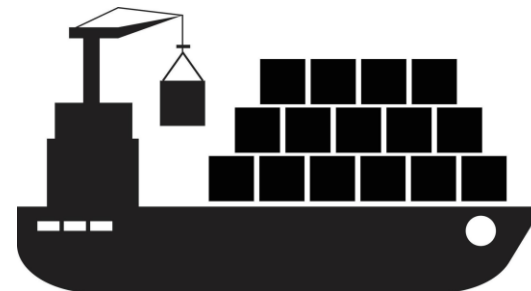

### DISCHARGE CERTIFICATE

Certificate that contains all the information from start to finish of the download process, detailing data such as:

- ✓ **Vessel information**
- ✓ **Mooring date and time**
- ✓ **Download start date and time**
- ✓ **Unit marking and discharge quantities**

### INSPECTION REPORT

Record establishing the unloaded and inspected load, signed by SCI Inspection and the company in charge of the unloading process.

### INSPECTION AND DAMAGE REPORT AS A WHOLE

Minutes that are issued to establish the amount of damage found in conjunction with the transport company.

### LETTER OF PROTEST

Letter that is sent to the Shipping Agency within 24 hours of completing the operation. This document is of great importance because it establishes and stipulates the amount of damage found at the time of the inspection. In turn, the following is attached:

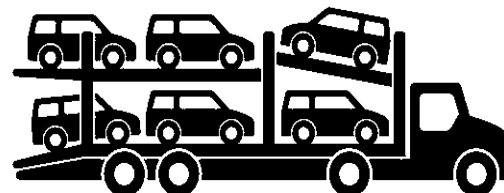

- ✓ **Detailed transaction information**
- ✓ **Photos of damage and operation**

### PRIMARY INSPECTION CERTIFICATE

Report intended to report the process and details of the deconsolidation operations of the units. (This certificate is only made when the warehouse is made of containers or Flat Rack ramps).

### CERTIFICATE OF CLEARANCE

Detailed certificate of the dispatch of the units by the assigned transport. Through daily spreadsheets we can allow our clients to observe the dynamics and the complete process of the dispatch of each of the units, establishing:

- ✓ **Dispatch hours**
- ✓ **Transporter truck patent**
- ✓ **Truck conditions and safety**

The importance of this service is to observe that no damage is generated when loading or moving vehicles through the ramps of the trucks. In the event of any damage, SCI Inspection issues a **CLAIM LETTER** indicating the information of the damaged unit and the truck involved.

### FINAL CERTIFICATE SECOND INSPECTION

Report generated to report all the important data found and observed at the time of carrying out the 2nd inspections of units in the collection centers in Santiago, an **INSPECTION REPORT IS MADE IN ADDITION TO THE DAMAGES FOUND**. This report is sent by email to the transport agency.
